**safe
clean
green**

Enjoy all the ambiance of a fireplace using a fraction of the energy!

Electric fireplaces use over **90% less energy** than gas to produce visual flames – with **zero emissions**.

- Maintain a safe, healthy environment for anyone concerned about indoor air quality.
- Reduce impact on the environment – no burning of fossil fuels, eliminating the emission of carbon dioxide and other greenhouse gases.
- Conserve energy by zone heating – provides supplemental heat for up to 400 square feet.

Electric vs. Gas Fireplace Energy Consumption

26" Self-trimming Electric Firebox

- Clean face design accentuates every fireplace and décor
- Realistic, patented 3D flame effect
- Hand-finished logs with inner glow
- Operates with or without heat

The clear advantages of Electraflame electric fireplaces

Realistic flame

Incredibly lifelike, patented flame technology creates the look of a wood fire.

Instant ambiance

Add the warm feel of a real fireplace to any living area in just minutes.

Safe – Clean – Green

100% energy efficient – no combustion means no emissions; glass stays cool to the touch.

Effective heat

Provides supplemental heat for up to 400 sq. ft. – warms without overheating the room.

Economical

Enjoy the flame for 3¢ per hour, 8¢ with the heater.*

Comfort and convenience

Includes remote control and adjustable thermostat.

Just plug it in

Requires no venting – simply plug into any standard household outlet.

Enjoy the flame with or without heat

Year-round comfort at the flick of a switch.

* Based on average national residential electricity rates. Electricity rates vary. Heater cycling at 50%.
